## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

**Claim 109 is rejected under 35 U.S.C. 102(a) as being anticipated by Yang et al. in A Low Power MEMS Silicone/Parylene Valve; Solid State Sensor and Actuator Workshop, Hilton Head Island SC, June 7-11, 1998 (hereinafter, Yang).**

Yang teaches the fabrication of a composite membrane that includes a deflectable membrane. The composite membrane comprises a first elastomer layer of Parylene C, a second elastomer layer of silicone rubber and a third elastomer layer of Parylene C (see figure 1 and accompanying text).

**Claim 109 is rejected under 35 U.S.C. 102(e) as being anticipated by US Patent 6,345,502 issued to Tai et al. (hereinafter, Tai).**

Tai teaches the fabrication of a composite membrane that includes a deflectable membrane. In one embodiment the composite membrane is a multilayered Parylene laminate structure. In another embodiment, the membrane is a Parylene/silicon rubber composite. See: figures 1f; 9d-9f and 13; the abstract; column 3, lines 35-65; column 4, lines 3-6 and 51-61; column 6, lines 28-44.

**Claim 109 is rejected under 35 U.S.C. 102(e) as being anticipated by US Patent 5,932,799 issued to Moles.**

Moles teaches the fabrication of a laminate structure comprising polymeric layers 4, 6, and 8, wherein layer 8 is an elastomeric material that forms a deflectable membrane. A thin elastomer layer (10) is bonded to the laminate of layer 4/6/8. See: figure 1c; the abstract; column 4, lines 19-29; column 9, lines 40-61.

***Response to Arguments***

Applicant's argument with respect to claim 109 has been considered but is moot in view of the new grounds of rejection.
